

React.js Internship Tasks (41–67)

Practical React.js internship tasks with concepts, tools, and implementation topics.

Task No.	Task Title
41	Install and Set Up React.js
42	Create Components in React.js
43	Use JSX in React.js
44	Use Props and State in React.js
45	Implement Form Handling
46	Implement Event Handling
47	Conditional Rendering
48	List Rendering
49	React Router
50	useState and useEffect Hooks
51	Custom Hooks
52	Context API
53	Redux State Management
54	Redux Middleware
55	Redux Thunk
56	Error Boundaries
57	Form Validation
58	API Calls using Axios and Fetch
59	Lazy Loading
60	Responsive Design
61	Styled Components
62	Material UI
63	Testing with Jest
64	UI/UX Improvements
65	Code Splitting
66	MobX State Management
67	Advanced Error Boundaries

Overview

This React.js internship module focuses on practical frontend development concepts. The tasks include React fundamentals, routing, state management, API integration, performance optimization, responsive UI design, testing, and advanced error handling.

Conclusion

By completing these tasks, students gain hands-on experience in building modern React.js applications using industry-standard tools and libraries.
